OFFICIAL NOTE

Assalamualaikum Wr. Wb.

After guiding, analyzing, briefing and correcting the writing of Refna's thesis
(The Student's Number is 1610203032) entitle : **THE EFFECT OF FRAYER
MODEL TOWARD THE STUDENTS' VOCABULARY MASTERY AT THE
EIGHTH GRADE OF MTSN 7 KERINCI.** We are of the opinion that this thesis
 has met the qualification as one of partial fulfillment of requirements for an
 undergraduate degree of English Education Program in Faculty of Education and
 Teacher Training at State Islamic Institute of Kerinci.

Thus, we processed this thesis to the faculty for immediate administrative
 process for final examination.

CERTIFICATE OF ORIGINALITY

The researcher hereby declares that the thesis entitled "**THE EFFECT OF FRAAYER MODEL TOWARD THE STUDENTS' VOCABULARY MASTERY AT THE EIGHTH GRADE OF MTSN 7 KERINCI**" is my own work and that, to the best my knowledge and belief, it contains no material previously published or written by another person, nor material which to substantial extent has been accepted for the award of any another educational institution, except where due acknowledgment is made in the thesis. Any contribution made to the research by others, with whom the researcher has worked at IAIN Kerinci or elsewhere, is fully acknowledged.

The researcher also declare that the intellectual content of this thesis is the product of my own work, except to the extent that assistance from others in the project design and conception or in style, presentation and linguistic expression is acknowledged.

Pulau Tengah,

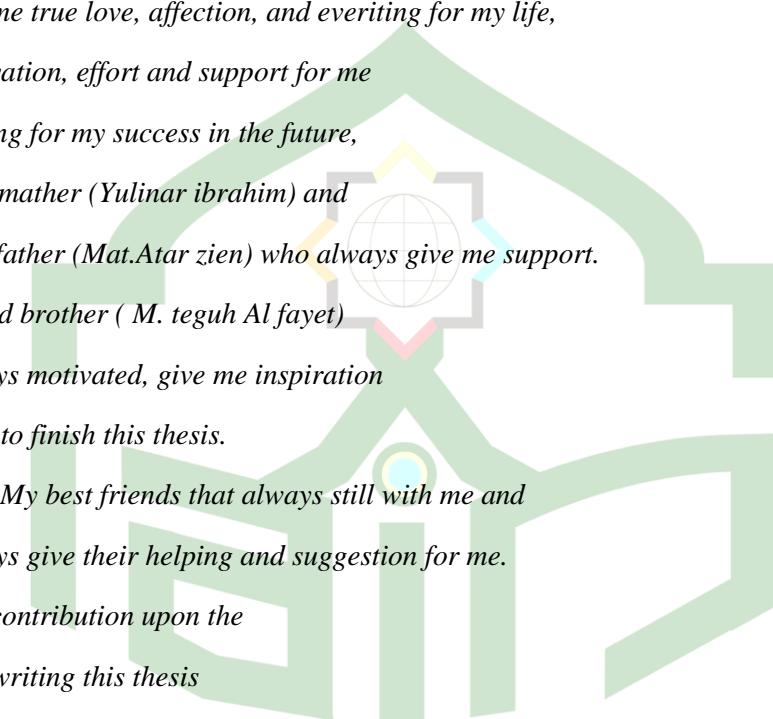

The Researcher

DEDICATION AND MOTTO

Dedication

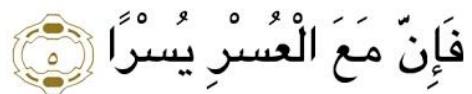

I dedicated this thesis for,
My beloved mother (Yusmarni) and father (Hakimin)
who give me true love, affection, and everiting for my life,
Also motivation, effort and support for me
And praying for my success in the future,
My Grandmother (Yulinar ibrahim) and
my Grandfather (Mat.Atar zien) who always give me support.
My beloved brother (M. teguh Al fayet)
Who always motivated, give me inspiration
And spirit to finish this thesis.
Special to My best friends that always still with me and
Who always give their helping and suggestion for me.
For your contribution upon the
succes of writing this thesis

The objective of this research was to know if there is any significant effect of using frayer model toward students' vocabulary mastery at the eighth grade of MTsN 7 Kerinci. The type of the reseach was quasi experimental research. The population of the research was the eighth grade students of MTsN 7 Kerinci, it was 75 students. Sample of this research consisted of 50 students from two classes. There were experiment class and control class. The analysis data used t-test. The result of the research showed that there was significance effect of using frayer model toward students' vocabulary mastery at the eighth grade of MTsN 7 Kerinci. It could be seen of hypothesis was gotten the mean of control class was 60 and the standard deviation was 102 while the experimental class was 67,8 and standard deviation was 118,16. And after doing t-test, it was found that $t_{observe} = 3,2 > t_{table} = 1,68$. It can be summarized that there was the significant effect of using frayer model toward students' vocabulary mastery at the eighth grade of MTsN 7 Kerinci.

Penelitian ini bertujuan untuk mengetahui apakah terdapat pengaruh yang signifikan penggunaan frayer model terhadap penguasaan kosakata siswa kelas delapan MTsN 7 Kerinci. Model penelitian yang digunakan adalah kuasi eksperimental. Populasi dari penelitian ini adalah semua siswa kelas delapan MTsN 7 Kerinci, yang berjumlah 75 siswa. Adapun sampel dalam penelitian ini berjumlah 50 siswa yang terdiri dari dua kelas, yaitu kelas eksperimen dan kelas kontrol. Data analisis yang digunakan adalah uji-t. Hasil dari penelitian ini dapat disimpulkan bahwa terdapat peningkatan yang signifikan dari penggunaan frayer model terhadap penguasaan kosakata siswa di MTsN 7 Kerinci. Hal ini dapat dibuktikan dari pengujian hipotesis dengan nilai tengah dari kelas kontrol yaitu 60 dan standar deviasinya adalah 102. Sedangkan untuk kelas eksperimen adalah 67,8 dan standar deviasinya adalah 118,16. Setelah melakukan uji-t, peneliti menemukan bahwa $t_{hitung} = 3,2 > t_{tabel} = 1,68$. Temuan ini menunjukkan bahwa kosakata siswa yang telah diajarkan dengan menggunakan frayer model memiliki dampak yang positif dan peningkatan yang signifikan.

CHAPTER I

INTRODUCTION

A. Background of the Study

Vocabulary is one of the language components that must be mastered by students. Vocabulary is very important element in language learning since it supports the four language skills. because if they not have much vocabulary, students can not speak or write easily. Moreover, Vocabulary should be interest into teaching the four skills: listening, speaking, reading, and writing. Learners need to acquire vocabulary learning strategies in order to discover the meaning of new word.¹

Commandment of God in the Holy Qur'an surah Al-baqarah 31, vocabulary is the first revelation and the first word that Allah teach to Adam.as:

31. and Allah taught Adam all the names, he showed them to the angels, saying: inform Me of the name of these, if you are truthful".²

¹Caroline T. Lines, *Practical English Language Teaching: Young Learners*, (Americas New York: McGraw-Hill Companies,2005),p.121

² Departmen Agama Republik Indonesia, *Al-Qur'an Mushaf dan Terjemahan Khodijah*,p.7

Vocabulary is one of English sub skills that must be taught to the students because vocabulary has an important role for all language skills. David Wilkins state that without grammar very little can be conveyed, without vocabulary nothing can be conveyed. In other words, the first thing that has to be mastered by language learners is vocabulary. In listening, students' vocabulary influences their understanding toward teacher's, speech, class discussion, and other speeches. The words that they choose in speaking effect how well they deliver a message. In reading, a student's vocabulary affects their ability to understand and comprehend a text. In addition, dealing with writing, students' vocabulary also influence how clear they convey their thought to the reader.³ In conclusion, vocabulary takes an important role for the students to be able to communicate. Moreover, with the mastery of the vocabulary the students will understand and mastery the four skills of English easily.

For the learners MTSN 7 kerinci, vocabulary mastery is not easy. So, that many students ignore the importance of vocabulary mastery. According to Thornbury there are some factors that cause difficulty in vocabulary mastery, they are as follows: Pronunciation, Spelling, Length and Complexity, Grammar, Meaning, Range, connotation and idiomatically.⁴ Furthermore, English vocabulary is different from Indonesia

³ Zeni safirah. *Improving Vocabulary Mystery Through Vocabulary Card of Grade VII students at SMP Institute Indonesia*, Thesis.(Yogyakarta state University 2016).p,2

⁴ Scoot Thornbury, *How to teach vocabulary*.Pearson Education Limited(2002).p,28

viewed of form, including pronunciation and spelling, meaning and the word use. In addition, the way of how pronunciation the word is quite different from writing. Therefore, people especially students who learn English often find difficulties in learning vocabulary.

Further, the researcher concluded that vocabulary is difficult because in teaching English vocabulary in the foreign language and students' must be serious to add new vocabulary, and learners need to acquire vocabulary learning strategies in order to discover the meaning of new words.

Besides, the researcher did observation in pre-research at the class A of eighth grade students of MTSN 7 Kerinci, the researcher found some problems that faced by the students in vocabulary class. There were many students at the eighth grade who did not have sufficient vocabulary, they were lazy to memorize all the unfamiliar words, because the technique and the method which used monotone and less of variation, it makes students feel bored in vocabulary class, teacher just gave list of vocabulary and instruct to the students for memorize it, but they just remember the vocabulary that day, not for long term. Moreover, many students felt that English vocabulary is the most difficult lesson to be learned. Based on the researcher interview with an English teacher at the eighth grade, the teacher said that the students difficult in understanding the lesson, they tended to open their dictionary, so that the students forgot the meaning easily.

Based on the problems above, the researcher interested to do research at the eighth grade of MTSN 7 Kerinci, and the researcher conclude that the solution of the problem of teaching vocabulary was by making an activity that students can involve to use the new vocabulary in the class, and efficient because it relates to the learning time students in the class, and the alternative strategy is Frayer Model. The researcher interested to know how the Frayer Model can be applied in teaching vocabulary in the classroom, and how the effect of Frayer Model to the students' vocabulary mastery. The researcher applied this strategy and would like to conduct an experimental research in MTsN 7 Kerinci, that study about **The Effect Of Frayer Model Toward The Students' Vocabulary Mastery at The Eighth Grade Of MTSN 7 Kerinci.**

B. Identification of the problem

1. The students lack of vocabulary.
2. Students feel lazy to memorize new vocabulary.
3. The students fell bored in learning vocabulary activity.
4. The students feel English vocabulary is difficult and make them uninterested in learning vocabulary.

C. Research question

Based on the background of the study above the question is: Is there any significant effect of Frayer Model to the students' vocabulary mastery?

D. Purpose of the research

The purpose of this research was to know the effect of Frayer Model to the students' vocabulary mastery in eighth grade of MTSN 7 kerinci.

E. Limitations of Research

Therefore, on the identification of the problem above, in this research the researcher limited the problem and focused on the aspect of meaning relationship (synonyms, antonyms, hiponyms and translation) by using Frayer Model to the students' vocabulary at eighth grade of MTSN 7 Kerinci.

F. Significance of the Research

The significance of this research expected to provide some advantages for English teaching and learning process. The significance of this research are :

1. For teacher

The result of the study to help the teacher get new method in learning process. So, this method can facilitate the teacher teaching process.

2. For students

K E R I N C I This Research can help students more excited in teaching English and can improve students' vocabulary and students can more understanding and comprehension.

3. For Researcher

The researcher will be able to apply the Frayer Model in teaching and learning English especially vocabulary.

4. For Next Research

This research can as reference or to give alternative way in teaching and learning vocabulary, and as information for conducting research in the same topic.

G. Definition of key terms

1. Vocabulary

Vocabulary is all the words knows or uses, all the words in a language, list of words with their meaning, especially in a book for learning a foreign language.⁵

2. Frayer Model

The Frayer Model is an instructional strategy teachers would use for helping students learn new concepts through the use of attributes and nonattributes. The Frayer Model has several steps where the teacher is helping students learn a concept by giving examples and nonexamples of the concept.⁶

3. MTSN 7 Kerinci

⁵ Victoria bull, Oxford, *learner's pocket dictionary fourth edition*, (New York, Oxford University Press,2011)P.495.

⁶ Janet Allen. *Inside Word: Tools for Teaching Academic Vocabulary, Grades 4-12*. Copyright 2007. Stenhouse Publishers.P,43

MTSN 7 Kerinci is one of Junior High School, which is managed by the Department of Religion Kerinci, that is located in Pulau Tengah Village, Keliling Danau Subdistrict

H. Hypothesis

There were two hypotheses in this research they are null hypothesis (H_0) and researcher hypothesis (H_1)

1. Null hypothesis (H_0): Frayer Model does not give significant effect in students' vocabulary mastery.
2. Alternative hypothesis (H_1): Frayer Model give significant effect students vocabulary mastery.

CHAPTER II

REVIEW OF LITERATURE

A. Review of related theories

1. Nature of vocabulary

a. Definition of vocabulary

A vocabulary is a set of familiar words within a person's language.

A vocabulary, usually developed with age, serves as a useful and fundamental tool for communication and acquiring knowledge.

Acquiring an extensive vocabulary is one of the largest challenges in learning a second language.⁷

Vocabulary can be defined as "words we must know to communicate effectively words in speaking (expressive vocabulary) and words in listening (receptive vocabulary)". according to Neuman ,defines vocabulary as "the total number of words in a language; vocabulary is a list of words with their meanings". According to While Ur, Vocabulary can be define, roughly, as the words teach in the foreign language.

However, a new item of vocabulary may be more than a single word: for example post office and mother in law, which are made up of two or three but express a single idea. There are also multi word idioms such as call it a day, where the meaning of the phrase cannot be deduce from

⁷Webster,definition of vocabulary, <http://en.m.wikipedia.org/wiki/Vocabulary> , retrieved on 21 oktober 2019

an analysis of the component words. A useful convention is to cover all cases by talking about vocabulary items rather than words.⁸

b. Types of vocabulary

A vocabulary means both a list of words and the range of words known by any one person. There are four main types of vocabulary:

1) Reading vocabulary

A literature person's vocabulary is all the words they can recognize when reading. This is generally the largest type of vocabulary simply because a reader tends to be exposed to more words by reading than by listening.

2) Listening vocabulary

A person's listening vocabulary is all the words they can recognize when listening to speech. People may still understand words they were not exposed to before using cues such as tone, gestures, the topic of discussion and the social context of the conversation.

INSTITUT AGAMA ISLAM NEGERI

3) Speaking vocabulary

A person's speaking vocabulary is all the words they use in speech. It is likely to be a subset of the listening vocabulary. Due to the spontaneous nature of speech, words are often misused.

⁸ Penny Ur. *A Course in Language Teaching: practice and theory*. Cambridge University, 1998), P.60

This misuse, though slight and unintentional, may be compensated by facial expressions and tone of voice.

4) Writing vocabulary

Words are used in various forms of writing from formal essays to social media feeds. Many written words do not commonly appear in speech. Writers generally use a limited set of words when communicating.⁹ For example, if there are a number of synonyms, a writer may have a preference as to which of them to use, and they are unlikely to use technical vocabulary relating to a subject in which they have no knowledge or interest.

c. Kinds of Vocabulary

Some experts divide vocabulary into two types: active and passive vocabulary. It distinguishes between these two types of vocabulary. The first type of vocabulary refers to the one that the students have been taught and that they are expected to be able to use. Meanwhile, the second one refers to the words which the students will recognize when they meet them, but which they will probably not be able to pronounce. Haycraft, quoted by Hatch and Brown, indicate two kinds of vocabulary, namely receptive vocabulary and productive vocabulary.

1) Receptive Vocabulary

⁹ Webster, *types of vocabulary*, <http://en.m.wikipedia.org/wiki/Vocabulary> , retrieved on 16 september 2019

Receptive vocabulary is words that learners recognize and understand when they are used in context, but which they cannot produce. It is vocabulary that learners recognize when they see or meet in reading text but do not use it in speaking and writing.

2) Productive Vocabulary

Productive vocabulary is the words that the learners understand and can pronounce correctly and use constructively in speaking and writing. It involves what is needed for receptive vocabulary plus the ability to speak or write at the appropriate time. Therefore, productive vocabulary can be addressed as an active process, because the learners can produce the words to express their thoughts to others.¹⁰

d. Indicator of vocabulary

There are some aspects that learner be mastering and the teacher should be teach in order to help the learners in mastering vocabulary.

And that aspect as follow:

1) Form: pronunciation and spelling

The learner has to know what a word sounds like (its pronunciation) and what it looks like (its spelling). These are fairly obvious characteristics, and one or the other will be perceived by the learner when encountering the item for the first

¹⁰Mofareh alqathani, Op.Cit.,p.25

time. In teaching, we need to make sure that both these aspects are accurately presented and learned.

2) Grammar

The grammar of a new item will need to be taught if this is not obviously covered by general grammatical rules. An item may have an unpredictable change of form in certain grammatical contexts or may have an unpredictable change of form in certain grammatical contexts or may have some idiosyncratic way of connecting with other words in sentences; it is important to provide learners with this information at the same time as we teach the base form.

When teaching a new verb, for example, we might give also its past form, if this is irregular (*think, thought*), and we might note if it is transitive or intransitive. Similarly, when teaching a noun, we may wish to present its plural form, if irregular (*mouse, mice*), or draw learners' attention to the fact that it has no plural

at all (*advice, information*). We may present verbs such as want and enjoy together with the verb form that follows them (*want to, enjoy-ing*), or adjectives or verbs together with their following prepositions (*responsible*), or adjectives or verbs

together with their following prepositions (*responsible for, remind someone of*).¹¹

3) Collocation

The collocations typical of particular items are another fact factor that makes a particular combination sound ‘right’ or ‘wrong’ in a given context. So this is another piece of information about a new item which it may be worth teaching.

When introducing words like decision and conclusion, for example, we may note that you take or make the one, but usually come to the other; similarly, you *throw a ball* but *toss a coin*; you may talk about someone being *dead tired* but it sounds odd to say *dead fatigued*.

4) Aspects of the meaning (1): denotation, connotation, appropriateness

The meaning of a word is what it refers to in the real world, its denotation; this is often the sort of definition that is given in a dictionary, for example, dog denotes a kind of animal; more specifically, a common, domestic carnivorous mammal; and both dank and moist mean slightly wet.

¹¹Penny Ur.Op.cit, P.60

A less obvious component of the meaning of an item is its connotation: the associations, or positive or negative feelings it evokes, which may or may not be indicated in a dictionary definition. The word *dog*, for example, as understood by most British people, has positive connotations of friendship and loyalty; whereas the negative associations of dirt and inferiority. Within the English language, *moist* has favourable connotations while *dank* has unfavourable; so that you could describe something as ‘pleasantly moist’ where ‘pleasantly dank’ would sound absurd.

A more subtle aspect of meaning that often needs to be taught is whether a particular item is the appropriate one to use in a certain context or not. Thus it is useful for a learner to know that a certain word is very common, or relatively rare, or ‘taboo’ in polite conversation, or tends to be used in writing but not in speech, or is more suitable for formal than informal discourse, or belongs to a certain dialect. For example, you may know that *weep* is virtually synonymous in denotation with *cry*, but it is more formal, tends to be used in writing more than in speech, and is in general much less common.¹²

5) Aspects of meaning (2): meaning relationships

¹²Ibid,P.61

How the meaning of one item relates to the meaning of others can also be useful in teaching. There are various such relationships: here are some of the main ones.

a) Synonyms: items that mean the same, or nearly the same; for example, *bright*. *Cleaver*, *smart* may serve as synonyms of *intelligent*.

b) Antonyms: items that mean the opposite; *rich* is an antonym of *poor*.

c) Hyponyms : items that serve as specific examples of a general concept; *dog*, *lion*, *mouse* are hyponyms of *animal*.

d) Co-hyponyms or co-ordinates: other items that are the ‘same kind of thing’; *red*, *blue*, *green*, and *brown* are co-ordinates.

e) Superordinates: general concepts that ‘cover’ specific items; *animal* is the superordinate of *dog*, *lion*, *mouse*.

f) Translation: words or expressions in the learners’ mother tongue that are (more or less) equivalent in meaning to the item being taught.

INSTITUT AGAMA ISLAM NEGERI

K E R N C I
Besides these, there are other, perhaps looser, ways of associating meaning that are useful in teaching. You can, for instance, relate parts to a whole (the relationship between *arm* and *body*); or associate items that are part of the same real-world context (*tractor*, *farmer*, *milking* and *irrigate* are all associated with *agriculture*).

6) Word formation

Vocabulary items, whether one-word or multi-word, can often be broken down into their component ‘bits’ exactly how these bits are put together is another piece of useful information – perhaps mainly for more advanced learners.

You may wish to teach the common prefixes and suffixes: for example, if learners know the meaning of sub-, un- and –able, this will help them guess the meanings of words like *substandard*, *ungrateful* and *untranslatable*. They should, however, be warned that in many common words the affixes no longer have any obvious connection with their root meaning (for example, *subject*, *comfortable*). New combinations using prefixes are not unusual, and the reader or hearer would be expected to gather their meaning from an understanding of their components (*ultra-modern*, *super-hero*).

Another way vocabulary items are built is by combining two words (two nouns, or a gerund and a noun, or a noun and a verb) to make one item: a single compound word, or two separate, sometimes hyphenated words (*bookcase*, *follow-up*, *swimming pool*). Again, new coinages using this kind of combination are very common.¹³

¹³ Ibid,p.62

e. Teaching vocabulary

Teaching vocabulary is one of the most discussed parts of teaching English as a foreign language. When the teaching and learning process takes place, problems would appear to the teachers. They have problems of how to teach students in order to gain satisfying results. The teacher should prepare and find out the appropriate techniques, which will various and up-to-date techniques. Teachers need to be able to master the material in order to be understood by students, and make them interested and happy in the teaching and learning process in classroom.

The teachers should be concerned that teaching vocabulary is something new and different from student's native language. They also have to take into account that teaching English for young learners is different from adults. The teacher have to know the characteristics of his or her learners. They more over need to prepare good techniques and suitable material in order to gain target of language teaching.¹⁴

2. Frayer model

a. Definition of Frayer Model

The Frayer Model is an instructional strategy teachers would use for helping students learn new concepts through the use of attributes and nonattributes. The Frayer Model has several steps

¹⁴Mofareh alqathani, Op.Cit,p.24

where the teacher is helping students learn a concept by giving examples and nonexamples of the concept. Steps (originally seven) include the following:

1. Define the concept giving attributes of the concept.
2. Show students how this concept differs from other similar concepts (by highlighting noncritical attributes).
3. Provide examples and explain what makes these examples.
4. Provide nonexamples and explain what makes these nonexamples.
5. Provide students with examples and nonexamples and ask them to determine whether they are examples or nonexamples.¹⁵

"This strategy stresses understanding words within the large context of a reading selection by requiring students, first, to analyze

INSTITUT AGAMA ISLAM NEGERI KERINCI the items (definition and characteristics) and, second, to synthesize/apply this information by thinking of examples and non-examples."¹⁶

The Frayer model helps students go beyond definitions to examine a concept by graphically organizing their prior knowledge into different areas. The model requires students to define a target

¹⁵Jannet Allen.Opcit.p,43-44

¹⁶Octavian Muning Sayekti, *Model Frayer untuk Penguasaan Kosa Kata*. Trihayu: Jurnal Pendidikan Ke-SD-an, Vol. 1, Nomor 3, mei 2015,hlm.209-214,p.213

vocabulary word or concept, identify characteristics and facts for the word, and apply this information by generating synonyms (examples) and antonyms (nonexamples). This information is placed on a graphic organizer that is divided into four sections to provide a visual representation for students. This instructional strategy is designed to support concept mastery, promote critical thinking, and assist students with identifying and understanding unfamiliar vocabulary in content areas. Students are not simply memorizing a word and its definition; rather, they are doing more with that word to help them truly understand the term.¹⁷

The graphic in the frayer model help students to think and describe the meaning about of a word or concept with :

1. Defining the term.
2. Describing its essential characteristics.
3. Providing synonyms or examples of the idea.

4. Offering antonyms or non- examples of the idea.

b. Implementation of Frayer Model

Before we implementing the vocabulary learning using frayer

model will be effectively, we have to implement the steps of:

1. Select a word from a self-contained passage of text.
2. Establish the purpose of the strategy.

¹⁷Angela Falter Thomas, “*Implementation of Vocabulary Strategies to Improve Scientific Literacy*,” National Science Teachers Association, Vol.39 (2016): 45-52.

3. Provide students with a Frayer Model and use a think-aloud as you model the process of using the Frayer Model to analyze the word and determine its meaning.

- a) Write the selected word.
- b) Write the characteristics of the selected word.

Scaffold as needed.

- c) Write examples or synonyms of the selected word.

Scaffold as needed.

- d) Write non-examples or antonym of the selected word. Scaffold as needed.

- e) Write a definition for the selected word in your own words. Scaffold as needed.

- f) Check the meaning of the word with the dictionary definition.

4. Have students use the Frayer Model to determine the meaning of words.

INSTITUT AGAMA ISLAM NEGERI KURNICI

c. Purpose of Frayer Model

The purpose of the Frayer Model is to identify and define unfamiliar concepts and vocabulary. Students define a concept/word/term, describe its essential characteristics, provide examples of the idea and suggest non examples of the idea (knowing what a concept isn't helps define what it is). This information is placed on a chart that is divided into four sections to provide a visual

representation for students. The model prompts students to understand words within the larger context of a reading selection, as it asks students to analyze the concept/word (definition and characteristics) and then synthesis or apply this information by thinking of examples and non examples. It also activates prior knowledge of a topic and builds connections.¹⁸

d. Explicitly Teaching the Frayer Model

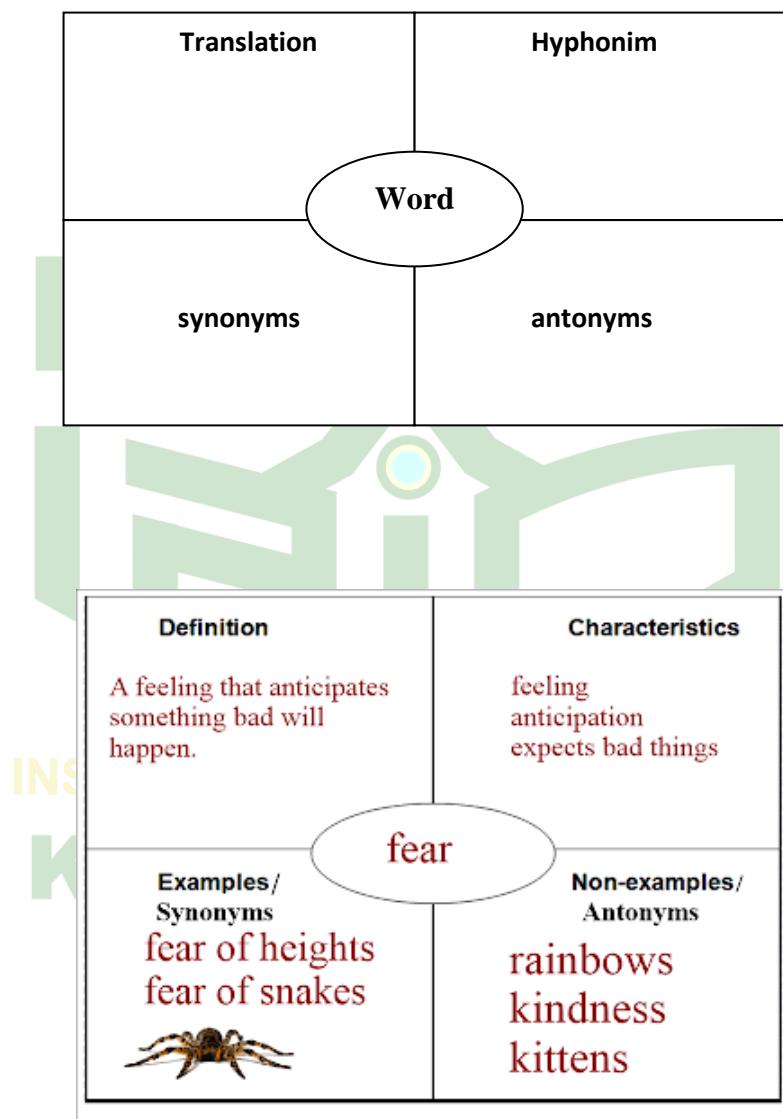

- 1) Step 1 Explain the Frayer model chart to the class by using a common word to demonstrate the various components. Model the type and quality of desired answers when giving the examples. Think out loud as you try to come up with examples and non examples, etc. Pictures/symbols can also be used.
- 2) Step 2 Then review a pre selected list of key concept words with the class before reading about the topic in the textbook. Read the text selection.
- 3) Step 3 Choose a key concept word from the topic read and have students help you complete the Frayer chart.
- 4) Step 4 Pass out blank copies of the Frayer Model or have students create a chart in their copies.
- 5) Step 5 Then students practice the strategy in pairs or in small groups with the key concepts and key vocabulary from the topic. (Each group could also be given different key concept words).

¹⁸Cikita Rahmadani.Opcit,p.20-21.

- 6) Step 6 The groups share their completed charts with each other.

Students can then add additional words/images/symbols to the Frayer chart until all four categories are substantially represented.¹⁹

e. Frayer Model Example

f. The Advantages of Frayer Model

¹⁹ Ibid.21-22

-
- 1) This strategy is excellent for revising vocabulary.
 - 2) Making the active students because every student have to define a concept or word or term.
 - 3) Giving the opportunity for all of students to describe the characteristics, provide examples of the idea and suggest non examples of the idea.
 - 4) Use critical thinking skills as they ask thoughtful questions to narrow down a large list of words to one "secret word."
 - 5) This strategy is a good activity for reviewing important vocabulary at the end of a lesson.
 - 6) Make the team work cohesively and build up the confidence of students.

g. The Disadvantages of Frayer Model

- 1) Some of the students will be passive because they have lack of vocabulary.
- 2) Some of the students missing the vocabularies because they do not focus just some active students who can focus on this strategy.
- 3) More confident students tend to dominate when defining the secret word.
- 4) This strategy will need more time.²⁰

²⁰ Ibid,p.23

B. Review Related Findings

In this part the researcher describes some previous researches which are relevant to this thesis, and some of the researcher's findings are stated concisely below:

The first, Cikita Rahmadani in "The effect of using frayer model on the students' vocabulary mastery (2018). The researcher did a experimental research. The population was the eighth grade students of SMP IT al ihya Tanjung Gading in academic year 2017/2018. The sample consisted of 52 students which is the experimental class (VIII B) was 26 students and control class (VIII C) was 26 students. The researcher gave multiple choice to collect the data. There were two test; pretest and post-test. The formula that used to analyze the data was t-test. The researcher found that the mean of pre-test in experimental class was 70.15 and control class was 35.85. Mean of post-test in experimental class was 87.88 and control class was 64.46.²¹

The second research was done by Mika Yuslin Aryanti (2017) entitled Improving Students' understanding new words in descriptive text by using Frayer Model to the eight grade students of SMP Kristen immanuel

²¹Cikita Rahmadani, "*The Effect Of Using Frayer Model On The students' Vocabulary Mastery At SMP IT AL Ihya Tanjung gading.*2018. Thesis,(UIN-SU Medan)."'

II kubu raya in the academic years 2016/2017. This research was Classroom action research. The population of this research was the eight grade students of SMP Kristen immanuel II kubu raya. The sample of this research was class VIII A. The data was collected through observation checklist and field note from the students' activity in the teaching learning process, and the students' answer sheets from the individual test which was to measure the students' understanding a new word on the text. And the Frayer Model technique could improve students' understanding new word from the first cycle to the third cycle, especially aspects of vocabulary in meaning, synonyms, and antonyms.²²

The third research was done by Masnidar (2012) "Penerapan Teknik Pembelajaran The Frayer Model untuk Meningkatkan Hasil Belajar Siswa Pada Mata Pelajaran Ilmu Pengetahuan Sosial di Kelas IV Sekolah Dasar negeri 004 Bangkinang Kecamatan Bangkinang Kabupaten Kampar". This research was Classroom action research. The population of this research was fourth year students at school year 2012-2013 numbering 33 students and the sample was frayer model learning technique and learning results of fourth year students. The data was collected through observation, test, and documentation. Students' learning results had increased at prior action was 57.58% or 19 students succeed, at the first cycle it was 69,70% or 23

²²Mika Yuslin Aryanti.*Improving Students Understanding New Words in Descriptive text by Using Frayer Model.* thesis.2017.thesis,(University Pontianak)

students succeed, and at the second cycle it was 87,88% or 39 students succeed.²³

From all the research, the researcher found that there were several differences found in each study, which will present as follows: the first research is “*The effect of using frayer model on the students' vocabulary mastery*” and the population was eight grade students of SMP IT al ihy Tanjung Gading. The second research is “*Improving Students' understanding new words in descriptive text by using Frayer Model*”. and the population was at eight grade students of SMP Kristen immanuel II Kubu Raya. The subject was conduct on new words in descriptive text. While the last, the title of the research is “*Penerapan Teknik Pembelajaran The Frayer Model untuk Meningkatkan Hasil Belajar Siswa Pada Mata Pelajaran Ilmu Pengetahuan Sosial*”. This study is not in English subject.

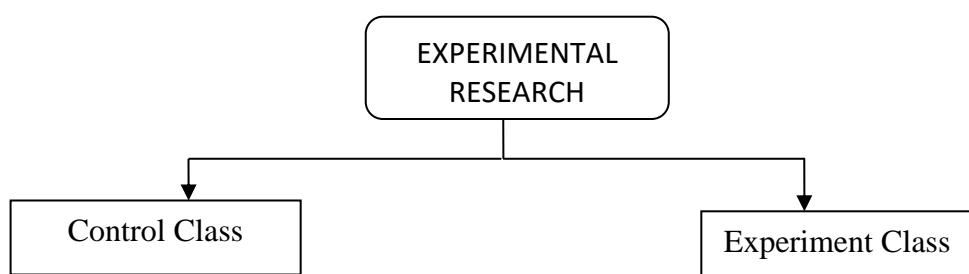

Meanwhile, the researcher conducted research about the effect of frayer model toward the students' vocabulary mastery at the eighth grade of MTSN 7 Kerinci. Although this research use the same strategy, but in some point is different from the previous study. researcher conducted limit the problem and will focus on Aspect of Meaning Relationship (synonyms, antonyms, hyponyms and translation), and this subject focused on their vocabulary mastery.

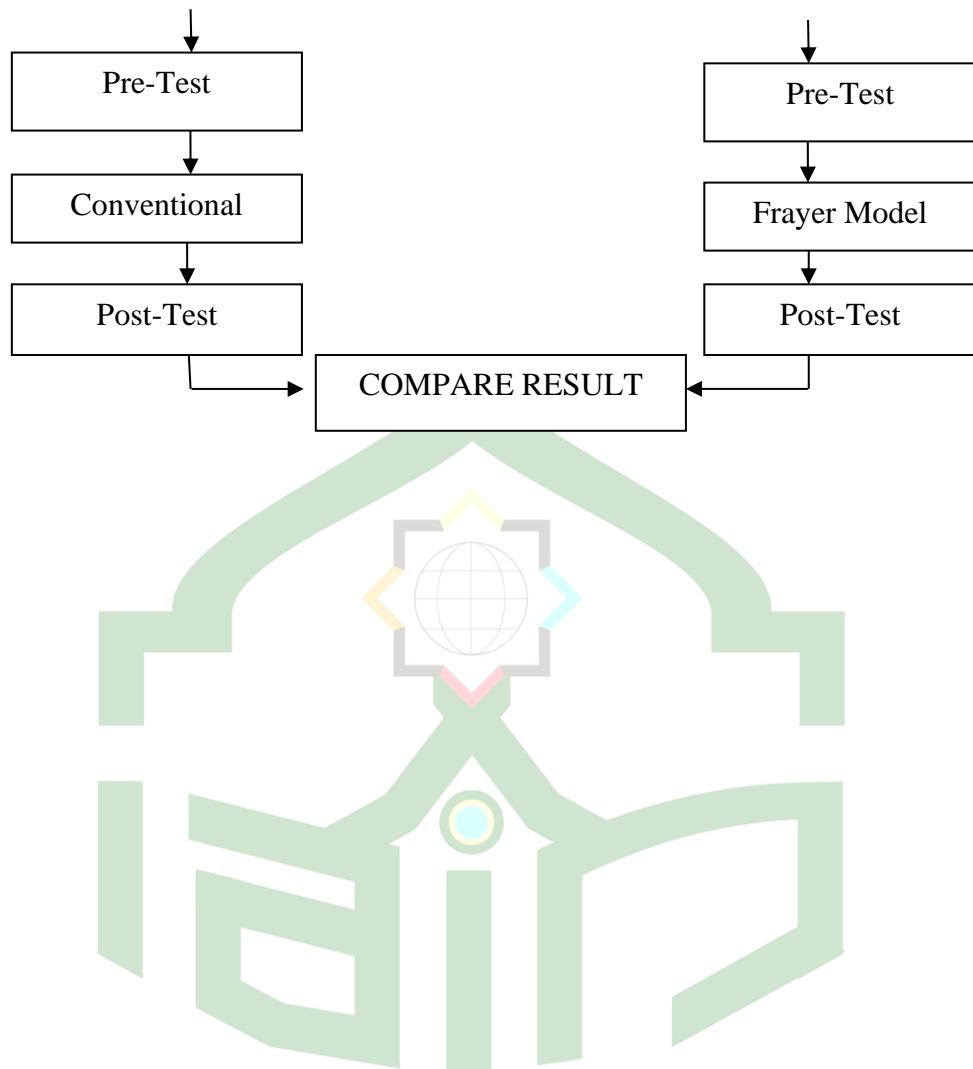

C. Conceptual framework

²³ Masnidar. “*Penerapan Teknik Pembelajaran The Frayer Model untuk Meningkatkan Hasil Belajar Siswa Pada Mata Pelajaran Ilmu Pengetahuan Sosial di Kelas IV Sekolah Dasar negeri 004 Bangkinang Kecamatan Bangkinang Kabupaten Kampar*”.2012.thesis.(UIN-Sultan Syarif Kasi-Riau)

In English teaching process, vocabulary is an essential task and an important part for learners. It is supposed to be a very effective as a tool of communication. In addition, the teacher must know the strategy and method that can motivate students to learn vocabulary and the researcher try to improve students' motivation and vocabulary mastery using frayer model strategy.

Frayer Model is used to categorize students' understanding of a vocabulary word or concept they are studying. Students can make a list of the definition, characteristics, examples, and non-examples on a chart with four quadrants. This model helps the students to develop a conceptual understanding of new vocabulary or creativity concept. Using the particular graphic organizer helps students to think about this term in a variety of ways. It allows them to visually demonstrate what they categorize based on their new knowledge. This can also serve as a great tool for review or as a study aid. The atmosphere classroom is more enjoyable and productive for learners. It is also good for revising and pronouncing vocabulary. This strategy can create positive energy to review important vocabulary at the end of a lesson. Their mind will be refreshed to get the secret words from every moment. The conceptual framework of this research can be described as follow:

INSTITUT AGAMA ISLAM NEGERI
K E R I N C I

CHAPTER III

RESEARCH METHODOLOGY

A. Research design

The design of the research used quantitative research, especially used quasi-experimental research. Experimental is aims to investigate the possibility of cause due to a person to wear or more treatment conditions and compare the results with a single or control group.²⁴

This research used the experimental class and control class. The experimental class used Frayer Model as a strategy in teaching vocabulary at eighth grade students of MTSN 7 Kerinci, and the control class used conventional method.

Table 1: Research Design

Ec	O ₁	X ₁	O ₂
Cc	O ₁	X ₂	O ₂

Note :

- Ec = Experiment class
- Cc = Control class
- O₁ = Pre- Test
- X₁ = Using Frayer Model
- X₂ = Conventional
- O₂ = Post- Test

B. Population and Sample

1. Population

²⁴ Suryana. *Metodologi penelitian Model Praktis Penelitian kuantitatif dan kualitatif*. Universitas Pendidikan Indonesia.2010,p.1

The population is the generalization region consisting of objects/subjects that have certain quantity and characteristics set by the researcher to be studies and then drawn in conclusion. The population is the generalazation region of the result of the study,²⁵ and the population for this research was all of the eight year students of MTSN 7 Kerinci. The population such as:

Table 2: The Population of the eighth grade students of MTSN 7 Kerinci

No	Class	Number of Students
1	VIII A	25
2	VIII B	25
3	VIII C	25
Total of students		75

Source: English teacher of MTsN 7 Kerinci.

2. Sample

A sample is part of a respondent or representative of the population that will be investigated.²⁶ In this research, the researcher needed two classes where one class as experiment class and one as control class. The sample of this research was the eighth grade of MTsN 7 Kerinci in academic year 2019/2020 that consist of 3 classes. The sample of this research used cluster random sampling. They were class B as experiment class and class C as control class. The total sample consists of 50 students.

²⁵Indra jaya.*Statistik Penelitian untuk pendidikan.*(citapustaka Media Printis. 2010)p.17

²⁶Ibid., P.174

Table 3: The total of a sample of the research

No	Class	Class	Female	Male	Total
1	Experiment class	VIII B	14	11	25
2	Control class	VIII C	15	10	25
Total of sample					50

Source: English teacher of MTsN 7 Kerinci.

The sampling was conducted using the following steps:

- a. The researcher collected the score of the first English language score of english semster tests of all students in eighth grade students of MTsN 7 Kerinci. Then mean and standard deviation calculate to know homogeneity.
- b. Normality test. It used to know where the sample on the population have normal distibution or not. Saphiro Wilk is used here.

Table 4: Normality of Population

Tests of Normality						
	Kolmogorov-Smirnov ^a			Shapiro-Wilk		
	Statistic	Df	Sig.	Statistic	Df	Sig.
Class VIIIA	.121	25	.200*	.961	25	.442
Class VIIIB	.123	25	.200*	.953	25	.293
Class VIIIC	.141	25	.200*	.959	25	.385

*. This is a lower bound of the true significance.

a. Lilliefors Significance Correction

The table show the score of Class VIII A was 0,442, it means

that was higher than alpa (0,05). The score of Class VIII B was

0,293 that was higher than alpa (0,05). And the score of Class VIII C was 0.385 that was higher than alpa (0,05). It means that, the data was distributed normally.

c. Test the population homogeneity

Homogeneity test was done to test whether the population has the same variance or not.

Table 5: Homogeneity of Population

Test of Homogeneity of Variances					
		Levene Statistic	df1	df2	Sig.
Score of English Semester test	Based on Mean	.070	2	72	.933
	Based on Median	.050	2	72	.952
	Based on Median and with adjusted df	.050	2	71.601	.952
	Based on trimmed mean	.060	2	72	.942

Based on the table above, the result of homogeneity testing show that the homogeneity was 0,933, that was higher than alpa (0,05). It means that, the data variance was homogenous.

INSTITUT AGAMA ISLAM NEGERI

d. Similarity test on average

e. After the normal population was found to be the same, then randomly taking two classes as a sample using *cluster random sampling* technique.²⁷

B. Technique of Collecting Data

²⁷ Sudjana, *Metode Statistika*, (Bandung, Tarsito,2002),.h.261-262

The techniques of collecting data that the researcher used in this research were:

1. Observation

The researcher did observation in pre-research at the class of eight grade students to know the problems in vocabulary class.

2. Pre-test

The researcher gave a pre-test to the class. It was test to the students. The Pre-test was intended to know the prior knowledge of the students on vocabulary mastery before giving the treatment.

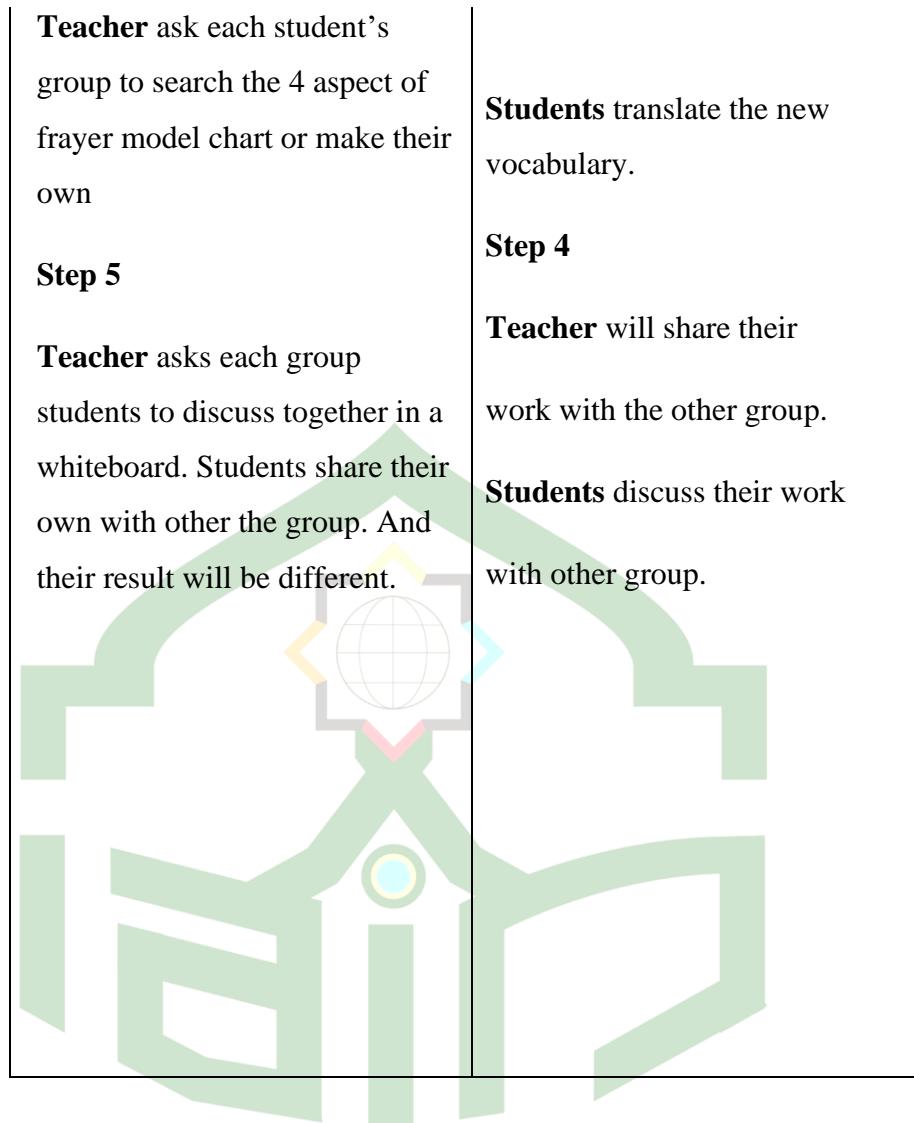

3. Treatment

The researcher gave treatment using Frayer Model in experimental class after pre-test, but in control class researcher used different matter.

Table 6: Research Procedure

Experimental Class (Frayer Model)		Control Class (Conventional)	
Teacher's Activity	Students' Activity	Teacher's Activity	Students' Activity
K	E	N	C

<p>Step 1</p> <p>Teacher opens the class by greeting to the students and explains in brief what they are going to do in the meeting.</p> <p>Students paid attention to the teacher's explanation and introduction, give comment or questions.</p>	<p>Step 1</p> <p>Teacher opens the class by greeting to the students and explains in brief what they are going to do in the meeting.</p> <p>Students paid attention to the teacher's explanation and introduction, give comment or questions.</p>
<p>Step 2</p> <p>Teacher explain the frayer model chart and give the example how to using frayer model to study vocabulary</p>	<p>Step 2</p> <p>Teacher open the text book and asks them to read the text book.</p>
<p>Step 3</p> <p>Teacher dividing the students in several groups and teacher discuss with students to select the new vocabulary from a topic (making a list of key Vocabulary concept).</p> <p>Students with the teacher will select the key concept from the list and then follow the teachers' clue.</p>	<p>Step 3</p> <p>Teacher with the students select the new vocabulary by using a dictionary and then the students answer the meaning it.</p>

4. Post-test

INSTITUT AGAMA ISLAM NEGERI KERTENCI

The last step was given post-test. The researcher gave after the treatment was finished. The purpose of post-test was to know the result of students' achievement after being taught by using Frayer Model.

5. Documentation

The last technique of collection data is documentation. The documentation used in this study is the data of English score in

semester test and photo during the study in experiment class and control class.

C. Instrument of The Research

The determination and the preparation instrument research is part of the research is very important. Instruments are tools for measuring, observation, or documenting quantitative data. The instrument may include a test, a questionnaire, a tally sheet, a log, an observational checklist, an inventory, or an assessment instrument.²⁸

1. Test

In this research, the researcher used the test as the instrument, the test divided into two test, those are pre-test and post-test.

Table 7: Indicator of vocabulary

Indicator of vocabulary		
	Subject	Number of item
Meaning Relationship	a. Synonyms	1-5
	b. Antonyms	6-10
	c. Hyponyms	11-15
	d. Translation	16-20

To determine the student's vocabulary score, the researcher used the formula as follows:

²⁸ John W. Creswell, *Educational Research: Planning, Conducting, and Evaluating Quantitative Research*, (Boston: Pearson, 2002).p.295

$$P = \frac{F}{N} \times 100$$

Where:

P : Scores obtained by the students (Assessment)

F: The obtained score

N: maximum score

2. Validity

Validity is an instrument measurement is said to be valid if the instrument can measure something exact what to do in measuring.²⁹

Content validity was assured by checking all items that was analyzed correspondence to the instructional objectives of the course. Then, the researcher used SPSS to calculated the data.

The criteria of validity as follows:

- a. If r-count > r-table is valid
- b. If r-count < r-table is not valid

Table 8: Criterias of Validity of the Instrument

K	r value	N	Criterias
	0,800-1,00		High
	0,400-0,600		Enough
	0,200-0,400		Middle
	0,000-0,200		Poor

The result of the validity of vocabulary mastery, there were 20 items got valid and 10 items got not valid, there were number 2, 7, 16,

²⁹ Maman abdurrahman. *Panduan Praktis memahami penelitian* (Bidang sosial – Administrasi-Pendidikan). CV Pustaka Setia. 2011, p.103

17, 21, 22, 25, 26, 27, and 28. Therefore, the researcher removed 10 items test that invalid and only used 20 item that valid in the research. (see appendix 5)

c. Difficulty index of item

The aim of difficulty index was to know the item is easy or difficult. In analyzing every item, the researcher utilizes index in every item calculated by SPSS.

Concerning how to give interpretation on numeral of difficulty index, the researcher used the following scale.

$IK = 0,00$: Very difficult
$0,00 < IK \leq 0,30$: Difficult
$0,30 < IK \leq 0,70$: Average
$0,70 < IK \leq 1,00$: Easy
$IK = 1,00$: Very Easy

There were 30 items that used for try out at Eighth grade SMPN 2 Kerinci. And after the researcher did try out to the students, the result of difficulty index were obtained 4 items got *very easy* levels, 6 items got *very difficult* level and 20 items got *average* levels.

The items that got *very easy* levels were number 5, 9, 24 and 28 with value $> 0,70$. While the items that got *difficult* levels were number 7, 11, 17, 25, 27 and 30, with value $< 0,30$. And the rest was in *average* level.

(see appendix 6). It means that it was suitable with the difficulty index table. And the items can be used for the real test.

d. Discrimination power index

If the test and an item measure the same ability or competence, we would expect that those having a high overall test score would have a high probability of being able to answer the item. We would also expect the opposite, answering the item correctly. Thus, a good item should discriminate between those who score high on the test and those who score low. The higher the discrimination index, the better the item can determine the difference between those with high test scores and those with low ones.

If all the persons of BA answer and item correctly, and all the persons of BB answer incorrectly, then $D=1$ (the minimum value of discrimination). Then the discrimination power index was counted using formula:

$$DP = \frac{BA}{JA} - \frac{BB}{JB}$$

NOTE:

BA : Number of up group member who has correct answer

BB : Number of down group member who has correct answer

JA : Numbers of up group members

JB : Numbers of down group members

DP : Discrimination³⁰

The clarification:

³⁰ Ibid, p.134

0,00 - 0,20	: Very Bad
0,20 - 0,40	: Enough
0,40 - 0,70	: Good
0,70 - 1,00	: Very good

In this result, there were 4 item got **very good** level, 11 items got **good** levels, 9 items got **enough** levels and 6 item got **very bad** levels. Such as number 7 got **very good** level with value 0,7. (see **appendix 7**). It means that the tests have a good discrimination power index.

3. Reliability

A measurement instrument is reliable if the measurement is consistent and accurate.³¹ Reliability as a conceptualized in quantitative research has two form: repeated measurement and internal consistency. Repeated measurement has to do with our ability to measure thing at different time. Meanwhile, internal consistency refer to how homogeneous the items of a test are. Then, the researcher used SPSS to calculated the data.

By following criterias:

$r_{11} \leq 0,20$	low reliability
$0,20 < r_{11} \leq 0,40$	sufficient reliability
$0,40 < r_{11} \leq 0,60$	middle reliability
$0,60 < r_{11} \leq 1,00$	high reliability

³¹Ibid,p.110

Table 9: Reliability

Reliability Statistics	
Cronbach's Alpha	N of Items
.713	31

In this result, the value of reliability were 0,713. It means, the interpretation criteria of the correlation coefficient was **high reliability** levels.
(see appendix 8)

D. Technique of Analysis Data

To know significant effect of frayer model toward the students's vocabulary mastery and those taught without using frayer model. The following formulas were used :

1. Test of Normality

A normality test was used to determine whether sample data has been drawn from a normally distributed population (within

INSTIUT AGAMA ISLAM NEGERI

KERTINI NCI Wilk statistic strategy because the samples has been less than 100. Minimun standard of normality test was 0,05. Moreover,

the researcher used SPSS to calculated the data.

2. Test of Homogeneity

The aims of test homogeneity were to see whether the data group has a homogeneous variance or not.³² Homogeneity test was obtained group of sample data with sources which has the same population variant. In this homogeneity test, the standard of minimum was 0,05. Furthermore, the researcher used SPSS to calculated data.

3. Test of Hypotheses

Hypothesis testing is a procedure that will produce a decision, namely a decision to accept or reject this hypothesis.

In this test, decisions made contain uncertainty, meaning that decision can be right or wrong.³³

The researcher was used SPSS to calculated the data to determine that the Frayer Model on students' vocabulary mastery is better than students who don't use it in eighth Grade in MTSN 7 Kerinci.

INSTITUT AGAMA ISLAM NEGERI

K E R I N C I
Effect size is simply a way of quantifying the size of the difference between two groups. It is easy to calculate, readily understood and can be applied to any measured outcome in education or social. And in this research Effect size is a method used to determine the effectiveness of the learning frayer model

³²Sudjana, *Metode Statistika*, (Bandung : PT Tarsito, 2005), Cet.1,p.249

³³Iqbal Hasan, *Analisis Data Penelitian Dengan Statistik*, (Jakarta: PT Bumi Aksara,2009), Cet.4,p.29.

to improve students' vocabulary mastery at eight Grade. For calculating the effect size researcher used Cohen's ***d*** formula:

$$d = \frac{\bar{X}_t - \bar{X}_c}{S_{\text{pooled}}}$$

Where:

d = Cohen's ***d*** effect size

\bar{X} = Mean (average of treatment or comparison conditions)

S = standard deviation

Subscripts: t refers to the treatment condition and c refers to the comparison condition (or control condition).

$$S_{\text{pooled}} = \sqrt{\frac{(n_t - 1)S_t^2 + (n_c - 1)S_c^2}{n_t + n_c}}$$

Where:

S_{pooled} : Standard deviation

n_t : Number of students of experiment class

n_c : Number of students of control class

S_t : Standard deviation of experiment class

S_c : Standard deviation of control class

Value of d describe how much the influence of the variable

K on treatment group.³⁴ the criteria of effect size is classified as follows:

Table 10: Classification of Effect Size

If d	Interpretation
$d < 0,2$	Small

³⁴Will Thalheimer. *How to calculate effect sizes from published research: A simplified methodology.* A work- Learning Research Publication (2002).p,4

$0,2 < d < 0,8$	Medium
$d > 0,8$	Big

INSTITUT AGAMA ISLAM NEGERI

CHAPTER IV

FINDINGS AND DISCUSSION

A. Finding

1. The Result of Test

This research was done at MTSN 7 Kerinci. The sample of this research was the eighth grade in Academic year 2019/2020. The students consisted of 50. There were two classes that involved in this research; they were experiment class and the control class. The class was chosen by calculating the normality and homogeneity, then the researcher chose the experiment class and the control class of the student's ability in each class of grade eight. After each class normal and homogen, then the researcher chose the experiment class and the control by mixing the name of the classes that were written in a piece of paper. And then, the researcher got VIIIB as the experiment class and VIIIC as the control class. In the research were 25 students in the experiment class and 25 students in control class.

These following research findings were the answers of research question existed in this research which consisted of one research question that was there any significance improvement of using frayer model in teaching vocabulary of eighth grade students at MTsN 7 Kerinci.

The first was researcher has done the pre-test at the early of the research to know the level of students' vocabulary mastery and the second was post-test in the end of research to know the result of the treatment that was done on the experimental class. The material of the test was the same level for both classes.

a. Pre-Test for Control

The pre-test conducted to ensure that the students have the same background and the same English proficiency. In this result, there were 25 students in the control class. Where 2 students got score 40, 2 students got score 45, 8 students got score 50, 6 students got score 55, 3 students got score 60, 2 students got score 70, 1 students got score 75, and only 1 students got score 80.

Based on the score above, after holding pre-test on the control class for the obtained results were the average score of the control class was 55. However, the average score of control class were still below the minimum completeness when it is compared with the maximum score is 80. (for more details see appendix 13)

b. Pre-Test for Experiment

The pre-test for experimental class conducted to ensure that the students have the same background and the same English proficiency.

In this result, there were 25 students in the control class, there were 2 students got score 40, 2 students got score 45, 7 students got score 50, 5 students got score 55, 5 students got score 60, only 1 students got score 65, 2 students got score 75, and only 1 students got score 80. That not much difference from pre-test for control class, where with the lower score was still 40, but different with higher score was 85 that was bit better than the result of pre-test control. And then,

the average score of experimental class was 55,6, that was higher than the average of the control class. (**see appendix 11**)

c. Post-Test for Control

the post-test of control class was nothing much change for the students score with the pre-test. In this result the students still got score 40 as the lower score and 85 as higher score.

There were 1 students got score 40, 1 students got score 45, 2 students got score 50, 7 students got score 55, 7 students got score 60, 3 students got score 65, 2 students got score 75, only 1 students got score 80, and 1 students got score 85. (**see appendix 14**)

Based on the score above, after holding pre-test on the control class at the obtained results were the average score of the control class was 60. However, the average score of control class were still below the minimum completeness when it is compared with the maximum score is 85.

d. Post-Test for Experiment

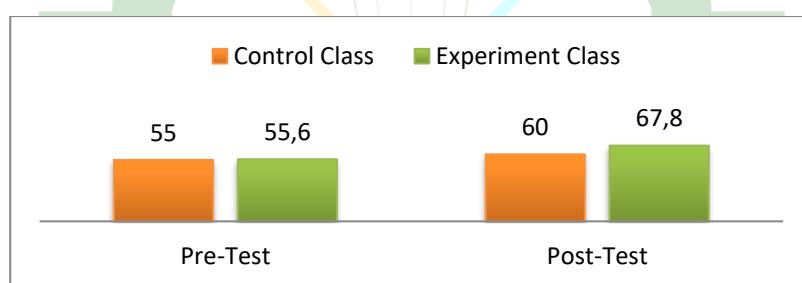

**INSTITUT AGAMA ISLAM NEGERI
KERNICHI**
After the researcher gave the treatment, the researcher gave post-test to the students in experimental class to find out the result of the whole treatment.

There were 2 students got score 50, 3 students got score 55, 4 students got score 60, 4 students got score 65, 3 students got score 70, 3 students got score 75, 4 students got score 80, only 1 students got score 85, and 1 students got score 90. (**see appendix 12**)

In this result, the lower score of students was 50 and the higher score of students was 90. That mean, more improvement than score of post-test in control class with the average score of experimental class was 67,8, that was higher than average value of control class in post-test.

e. The Graphic Result of Students' Control and Experimental Class

The average score comparison between the experimental class and control class before and after treatment at the eighth grade of MTsN 7 Kerinci. Can be seen in the following graphic:

From the graphic above, after holding pre test on the experimental class and the control class at the obtained results are the average score of the experimental class was 55,6 while the average score of the control class was 55. After holding post test on the experiment class and the control class at the obtained result were the average score of the experiment class was 67,8 while the average score of the control class was 60. It means that, frayer model is better to use than the conventional method in teaching English reading.

2. Hypothesis Testing

Before testing hypothesis by using t-test formula, the researcher had to test the normality and homogeneity first as the requirement of the analysis whether the data were from the normal population or not and homogeneity or not. It was based on the assumption that the data that could be used as the data in t-test was the data that was distributed normally and homogeneity. The data used was the post-test data.

a. Normality Testing

Test normality was a form of testing to know the data distributed normal or not.

Table 11 : Normality Testing Of Data

Tests of Normality						
	Kolmogorov-Smirnov ^a			Shapiro-Wilk		
	Statistic	df	Sig.	Statistic	Df	Sig.
PreTest Result of Experiment	.172	25	.054	.916	25	.114
PostTest Result of Experiment	.130	25	.200*	.946	25	.202
PreTest Result of Control	.220	25	.003	.900	25	.119
PostTest Result of Control	.245	25	.000	.907	25	.139

*. This is a lower bound of the true significance.
a. Lilliefors Significance Correction

The table above showed that the student score of pre test for experiment class was 0,114 that was higher than Alpa (0,05) and the score of the students of post test for experimental class was 0,202 that

was higher than Alpa (0,05). In addition, the student score of pre test for control class was 0,119 that was higher than alpa (0,05) and post test was 0,139 that was higher than alpa (0,05) it means that the data was distributed normally. (see appendix 15)

b. Homogeneity Testing

Homogeneity test was used to know whether some variants are from the same population or not. To calculate the F value, the researcher used SPSS. The following table was homogeneity test result :

Table 12: Homogeneity of the Data

		Levene Statistic	df1	df2	Sig.
Students Score	Based on Mean	.632	3	96	.596
	Based on Median	.628	3	96	.598
	Based on Median and with adjusted df	.628	3	94.862	.598
	Based on trimmed mean	.621	3	96	.603

In this result, the calculation of homogeneity testing show that

was higher than alpa (0,05). It means that, the data variance was

K E R I N C I

After found the normality and homogeneity of the data, further analysis was done in order to know wether the research hypothesis was received or rejected. Therefore, the researcher used t-test and calculated using SPSS.

The t-test used in analyzing post-test score is to know the significant improvement of using frayer model to ward students' vocabulary mastery. There were two types of hypothesis, they were:

H_a = There is significant different between students'vocabulary mastery in Experimental class and Control class.

H_0 = There is no significant different between students'vocabulary masteryin Experimental class and Control class.

The hypothesis is determined by using the following criteria:

- 1) If t_{observed} is less than t_{table} , it means that there is no significant effect of using frayer model in teaching vocabulary on the students' vocabulary mastery of the eighth grade at MTsN 7 Kerinci and the null hypothesis is accepted and the alternative hypothesis is rejected.
- 2) If t_{observed} is higher than t_{table} , it means that There is significant effect of using frayer model in teaching vocabulary on the students' vocabulary mastery of the eighth grade at MTsN 7 Kerinci and the null hypothesis is rejected and the alternative hypothesis is accepted.

**INSTITUT AGAMA ISLAM NEGERI
KERINCI**
Based on the result of post test, it was found that the average of the experimental class was higher than the average of the control class. The following table showed the hypothesis test result :

Table 13: T-Test Result

Group Statistics	
------------------	--

	Class	N	Mean	Std. Deviation	Std. Error Mean
Students Score	PreTest Experiment	25	55.60	10.137	2.027
	PostTest Experiment	25	65.60	11.394	2.279

Independent Samples Test									
	Levene's Test for Equality of Variances		t-test for Equality of Means						
	F	Sig.	T	Df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
								Lower	Upper
Students Score	Equal variances assumed	1.071	0.306	-3.279	48	0.002	-10.000	3.050	-16.133
	Equal variances not assumed			-3.279	47.358	0.002	-10.000	3.050	-16.135

After the scores of the experimental class and the control

class had been analyzed, the calculation of t test show $t_{obs} = 3,279$ while for the $t_{table} = 1,68$ in degree of freedom 48 at level of significance 0,05. (see appendix 17) It means that t_{obs} was higher than t_{table} . So, the difference of the two classes of teaching above was significant.

c. Effect Size

Effect Size used to know the greatest effectiveness of the learning model, other terms can be interpreted as a step to measure how much scale the effectiveness of the method/model of the learning we have tested and applied to the students.

The result of effect size was 0,75. That included medium levels. That mean this strategy have enough effect to used in improvement students' vocabulary mastery. (**see appendix 18**)

B. Discussion

Based on the statistical analysis of the data obtained, the researcher would like to interpret and discuss the result. The researcher did this research in MTsN 7 Kerinci, where the students' the eighth grade as population and the sample of this research was VIIIB as experimental class and VIIIC as control class. In this result, the researcher tried to used Frayer Model as a strategy in teaching Vocabulary mastery. Therefore, that strategy would be easy to apply in teaching and learning process.

Before using the frayer model the maxsimum score of the students in experiential class was 80 and the minimum score was 40. While after using the frayer model the maximum score was 90 and the minimum score was 50. It's means, the students' score have more improvement. It can conclude that the score in after frayer model was higher than before using frayer model or the learning result of teaching vocabulary by using frayer model was better than the conventional method. In addition, the researcher found the students in

experimental class were more active than the students in the control class that teaching and learning vocabulary without using frayer model.

Then hypothesis with 5% (0,05) of level significant and the value of t_{table} of the level freedom df (48). The value t-count (3,2) was higher than the value of t-table (1,68). It had mention that $t_{observe}$ in this research was higher than the value of the t_{table} . It meant that H_a was accepted and H_o was rejected. In other word, there was significant effect of using frayer model in teaching vocabulary at the eighth grade of MTSN 7 Kerinci.

Moreover, after conducted this research, the researcher found some previous researches that use frayer model: The first, Cikita Rahmadani in "The effect of using frayer model on the students' vocabulary mastery (2018). The researcher did a experimental research. The population was the eighth grade students of SMP IT al ihya Tanjung Gading in academic year 2017/2018. The sample consisted of 52 students which is the experimental class (VIII B) was 26 students and control class (VIII C) was 26 students. The researcher gave multiple choice to collect the data. There were two test; pretest and post-test. The formula that used to analyze the data was t-test. The researcher found that the mean of pre-test in experimental class was 70.15 and control class was 35.85. Mean of post-test in experimental class was 87.88 and control class was 64.46.³⁵

³⁵Cikita Rahmadani, "*The Effect Of Using Frayer Model On The students' Vocabulary Mastery At SMP IT AL Ihya Tanjung gading.2018. Thesis,(UIN-SU Medan.)*"

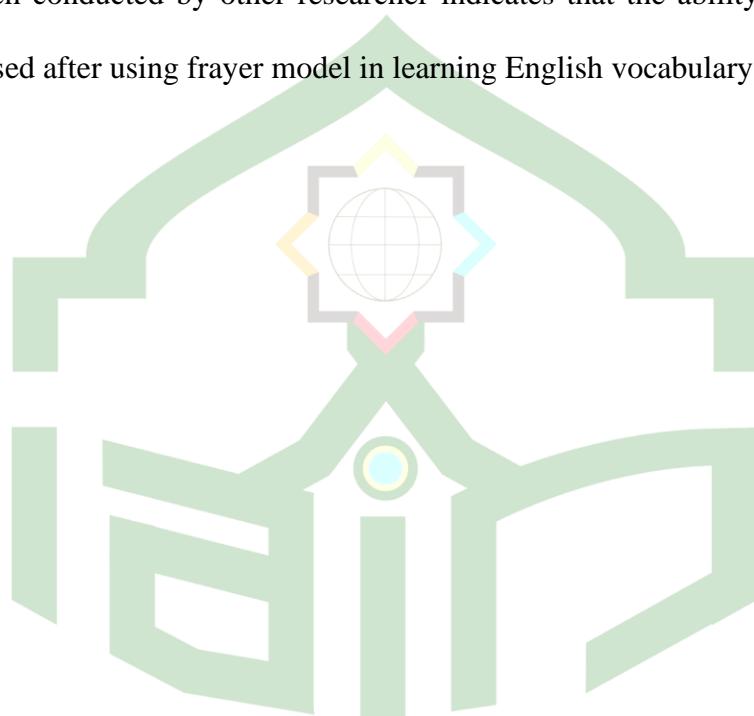

The second research was done by Mika Yuslin Aryanti (2017) entitled Improving Students' understanding new words in descriptive text by using Frayer Model to the eight grade students of SMP Kristen immanuel II kubu raya in the academic years 2016/2017. This research was Classroom action research. The population of this research was the eight grade students of SMP Kristen immanuel II kubu raya. The sample of this research was class VIII A. The data was collected through observation checklist and field note from the students' activity in the teaching learning process; and the students' answer sheets from the individual test which was to measure the students' understanding a new word on the text. And the Frayer Model technique could improve students' understanding a new word from the first cycle to the third cycle, especially aspects of vocabulary in meaning, synonyms, and antonyms.³⁶

The third research was done by Masnidar (2012) "Penerapan Teknik Pembelajaran the Frayer Model untuk Meningkatkan Hasil Belajar Siswa Pada Mata Pelajaran Ilmu Pengetahuan Sosial di Kelas IV Sekolah Dasar negeri 004 Bangkinang Kecamatan Bangkinang Kabupaten Kampar". This research was Classroom action research. The population of this research was fourth year students at school year 2012-2013 numbering 33 students and the sample was frayer model learning technique and learning results of fourth year students. The data was collected through observation, test, and documentation. Students'learning results had increased at prior action was 57.58% or 19

³⁶Mika Yuslin Aryanti.*Improving Students Understanding New Words in Descriptive text by Using Frayer Model.*thesis.2017.thesis,(University Pontianak)

stdudents succeed, at the first cycle it was 69,70% or 23 students succeed, and at the second cycle it was 87,88% or 39 students succeed.³⁷

It can be concluded that the frayer model is the strategy that effective in teaching vocabulary. Because of the research that researcher did and the research conducted by other researcher indicates that the ability of students increased after using frayer model in learning English vocabulary.

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the result in previous chapter, it can be concluded that there was significant effect of using frayer model toward students' vocabulary mastery at the eighth grade of MTSN 7 Kerinci. The success of the research can be proved by the students score in vocabulary test of post-test for both classes, as follows:

The result of post-test showed the differences result achieved by the control class which was taught without using frayer model with the experimental class which was taught by using frayer model. The mean of control class was 60 and the standard deviation was 10,09 while the experimental class was 67,8 and standard deviation was 10,87. And after doing t-test, it was found that $t_{\text{observe}} = 3,2 > t_{\text{table}} = 1,68$. So there is difference students' vocabulary score of the eighth grade of MTSN 7 Kerinci was taught by using frayer model and without frayer model. The finding showed that there was the significant effect of using frayer model toward students' vocabulary mastery.

B. Suggestion

Based on the conclusion of the study above, there are some suggestions that can be considered in the following:

a. The Teacher

The teacher must pay attention to the students' level, problems in learning English, and Frayer Model strategy used by the teacher in teaching English so that the teachers are able to use the best technique in teaching learning activity. The teachers are also able to be aware with another instructional technique that can be used to teach foreign language to motivate and make the students' interest in learning foreign language.

b. The Students

Frayer model of technique used to develop the students' vocabulary. It could help the students more motivate to remember words, than they have received from the teacher or a textbook (the students could learn it easily). Therefore, the researcher recommended to the students to using frayer model as a technique to increase their ability in English vocabulary.

c. The Other Readers

**INSTITUT AGAMA ISLAM NEGERI
KERNICHI**

The result of this study can be used as input by the other readers who want to make a study about teaching vocabulary as reference.

Cronbach's Alpha	N of Items
.825	30

Based on the calculating above obtained $r_{II} = 0,825$ means the reliability of learning outcomes tests that are used as research instrument has a high test reliability

Appendix 18

Effect size (Cohen's d)

$$d = \frac{\bar{X}_t - \bar{X}_c}{S_{\text{pooled}}}$$

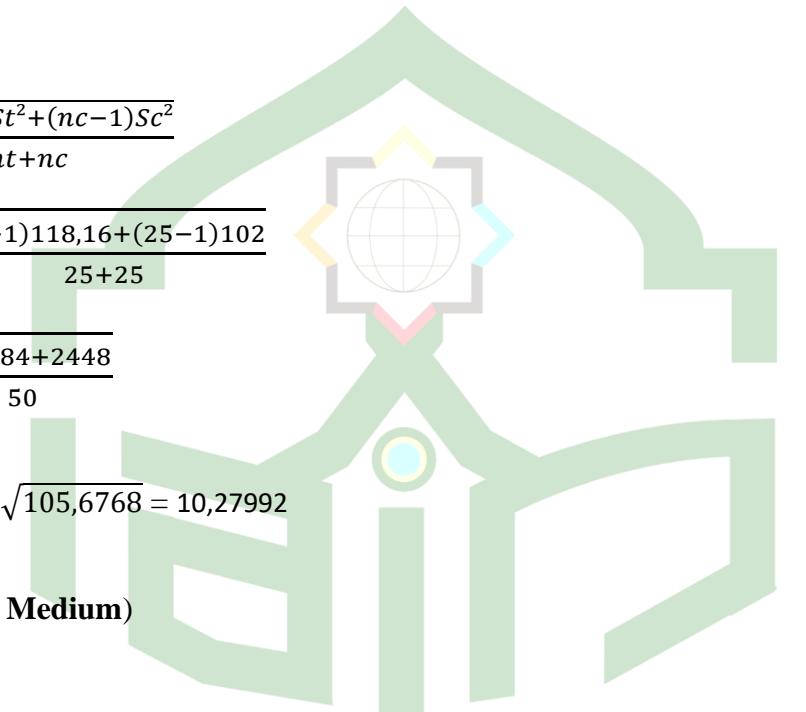

$$= \frac{67,8 - 60}{10,27992}$$

$$= 0,758761$$

With:

$$\begin{aligned} S_{\text{pooled}} &= \frac{\sqrt{(nt-1)St^2 + (nc-1)Sc^2}}{nt+nc} \\ &= \sqrt{\frac{(25-1)118,16 + (25-1)102}{25+25}} \\ &= \sqrt{\frac{2835,84 + 2448}{50}} \\ &= \sqrt{\frac{5283,84}{50}} = \sqrt{105,6768} = 10,27992 \end{aligned}$$

(the effect size is **Medium**)

RENCANA PELAKSANAAN PEMBELAJARAN (RPP) CONTROL CLASS

Sekolah	: MTSN 7 Kerinci
Mata Pelajaran	: Bahasa Inggris
Kelas /Semester	: VIII/Genap
Materi Pokok	: Writing (My Uncle is Zookeeper)
Focus	: Vocabulary (describe the animals in the zoo)
Alokasi Waktu	: 2x40 menit
Pertemuan Ke	: 1

A. Kompetensi Inti

KI 1 Menghargai dan menghayati ajaran agama yang dianutnya

KI 2 Menunjukkan perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong), santun, percaya diri dalam berinteraksi secara efektif dengan lingkungan social dan alam dalam jangkauan pergaulan dan keberadaannya

KI 3 Memahami pengetahuan (faktual, konseptual, dan prosedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya terkait fenomena dan kejadian tampak mata

KI 4 Mencoba, mengolah, dan menyaji dalam ranah konkret (menggunakan, mengurai, merangkai, memodifikasi, dan membuat) dan ranah abstrak (menulis, membaca, menghitung, menggambar, dan mengarang) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang-teori

INSTITUT AGAMA ISLAM NEGERI

B. Kompetensi Dasar

1. Mensyukuri kesempatan dapat mempelajari bahasa inggris sebagai bahasa pengantar komunikasi internasional yang diwujudkan dalam semangat belajar.
2. Menunjukkan perilaku sungguh-sungguh, tanggung jawab, peduli, kerjasama dan santun dalam melaksanakan komunikasi interpersonal dengan guru dan teman.
3. Menunjukkan perilaku jujur, disiplin, pecraya diri, dan bertanggung jawab dalam melaksanakan komunikasi transaksional dengan guru dan teman
4. Menunjukkan perilaku tanggung jawab, peduli, kerjasama dan cinta damai dalam melaksanakan komunikasi fungsional.

5. Memahami teks khusus dalam bentuk teks *My Uncle is Zookeeper*, sangat pendek dan sederhana, terkait hari-hari spesial dengan memperhatikan fungsi sosial, struktur teks, dan unsur kebahasaan, secara benar dan sesuai konteks.

C. Indikator Pencapaian Kompetensi (IPK)

1. Menulis kata dengan topic *My Uncle is Zookeeper*
2. Mengidentifikasi kata dengan topic *My Uncle is Zookeeper*
3. Memahami kata dengan topic *My Uncle is Zookeeper*

D. Tujuan Pembelajaran

Setelah mengikuti serangkaian kegiatan pembelajaran peserta didik dapat:

1. Peserta didik dapat meningkatkan keterampilan, pemahaman, dengan kemampuan, megingat vocabulary dari topic *My Uncle is Zookeeper* dengan struktur teks yang benar sesuai dengan teknik yang akan diterapkan.
2. Siswa dapat menyebutkan kata dari teks *My Uncle is Zookeeper* terkait dengan kehidupan sehari-hari.
3. Siswa mampu mengungkapkan kata dari topic *My Uncle is Zookeeper* dengan menggunakan ragam bahasa lisan sederhana dalam kehidupan sehari-hari.
4. Peserta didik dapat dipercaya, rasa hormat dan perhatian, tekun, tanggung jawab dan berani
5. Para peserta didik dapat memahami dan menebak kata dan saling kerjasama.

E. Materi Pembelajaran

My Uncle is Zookeeper
describe Animals in the zoo
Animals in the zoo

- Elephants
- Tigers
- Bears
- Mongkey

RENCANA PELAKSANAAN PEMBELAJARAN (RPP) CONTROL CLASS

Sekolah	: MTSN 7 Kerinci
Mata Pelajaran	: Bahasa Inggris
Kelas /Semester	: VIII/Genap
Materi Pokok	: Speaking (What are you doing?)
Focus	: Vocabulary
Alokasi Waktu	: 2x40 menit
Pertemuan Ke	: 2

A. Kompetensi Inti

KI 1 Menghargai dan menghayati ajaran agama yang dianutnya

KI 2 Menunjukkan perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong), santun, percaya diri dalam berinteraksi secara efektif dengan lingkungan social dan alam dalam jangkauan pergaulan dan keberadaannya

KI 3 Memahami pengetahuan (faktual, konseptual, dan prosedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya terkait fenomena dan kejadian tampak mata

KI 4 Mencoba, mengolah, dan menyaji dalam ranah konkret (menggunakan, mengurai, merangkai, memodifikasi, dan membuat) dan ranah abstrak (menulis, membaca, menghitung, menggambar, dan mengarang) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang/teori

B. Kompetensi Dasar

1. Mensyukuri kesempatan dapat mempelajari bahasa inggris sebagai bahasa pengantar komunikasi internasional yang diwujudkan dalam semangat belajar.
2. Menunjukkan perilaku sungguh-sungguh, tanggung jawab, peduli, kerjasama dan santun dalam melaksanakan komunikasi interpersonal dengan guru dan teman.
3. Menunjukkan perilaku jujur, disiplin, pecraya diri, dan bertanggung jawab dalam melaksanakan komunikasi transaksional dengan guru dan teman
4. Menunjukkan perilaku tanggung jawab, peduli, kerjasama dan cinta damai dalam melaksanakan komunikasi fungsional.

5. Memahami teks khusus dalam bentuk *What are you doing?*, sangat pendek dan sederhana, untuk mengkomunikasikan keadaan dan kejadian yang sedang berlangsung untuk berbagi informasi dengan orang lain, secara benar dan sesuai konteks.

C. Indikator Pencapaian Kompetensi (IPK)

1. Menulis kata dengan topic *What are you doing?*
2. Mengidentifikasi kata dengan topic *What are you doing?*
3. Memahami kata dengan topic *What are you doing?*

D. Tujuan Pembelajaran

Setelah mengikuti serangkaian kegiatan pembelajaran peserta didik dapat:

1. Peserta didik dapat meningkatkan keterampilan, pemahaman, dengan kemampuan, mengingat vocabulary dari topic *What are you doing?* dengan struktur teks yang benar sesuai dengan teknik yang akan diterapkan.
2. Siswa dapat menyebutkan kata dari teks *What are you doing?* terkait dengan kehidupan sehari-hari.
3. Siswa mampu mengungkapkan kata dari topic *What are you doing?* dengan menggunakan ragam bahasa lisan sederhana dalam kehidupan sehari-hari.
4. Peserta didik dapat dipercaya, rasa hormat dan perhatian, tekun, tanggung jawab dan berani
5. Para peserta didik dapat memahami dan menebak kata dan saling kerjasama.

The snow glows white on the mountain tonight
Not a footprint to be seen
A kingdom of isolation
And it looks like I'm the queen

The wind I howling like this swirling storm inside

Couldn't keep it in, heaven knows I've tried

Don't let them in, don't let them see

Be the good girl you always have to be

Conceal, don't feel, don't let them know

Well, now they know

Let it go, let it go
 Can't hold it back anymore
 Let it go, let it go
 Turn away and slam the door.

RENCANA PELAKSANAAN PEMBELAJARAN (RPP)
EXPERIMENT CLASS

Sekolah	: MTSN 7 Kerinci
Mata Pelajaran	: Bahasa Inggris
Kelas /Semester	: VIII/Genap
Materi Pokok	: Writing (<i>My Uncle is Zookeeper</i>)
Focus	: Describe the animals in the zoo
Alokasi Waktu	: 2x40 menit
Pertemuan Ke	: 1

J. Kompetensi Inti

KI 1 Menghargai dan menghayati ajaran agama yang dianutnya

KI 2 Menunjukkan perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong), santun, percaya diri dalam berinteraksi secara efektif dengan lingkungan social dan alam dalam jangkauan pergaulan dan keberadaannya

KI 3 Memahami pengetahuan (faktual, konseptual, dan prosedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya terkait fenomena dan kejadian tampak mata

KI 4 Mencoba, mengolah, dan menyaji dalam ranah konkret (menggunakan, mengurai, merangkai, memodifikasi, dan membuat) dan ranah abstrak (menulis, membaca, menghitung, menggambar, dan mengarang) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang-teori

K. Kompetensi Dasar

1. Mensyukuri kesempatan dapat mempelajari bahasa inggris sebagai bahasa pengantar komunikasi internasional yang diwujudkan dalam semangat belajar.
2. Menunjukkan perilaku sungguh-sungguh, tanggung jawab, peduli, kerjasama dan santun dalam melaksanakan komunikasi interpersonal dengan guru dan teman.
3. Menunjukkan perilaku jujur, disiplin, pecraya diri, dan bertanggung jawab dalam melaksanakan komunikasi transaksional dengan guru dan teman
4. Menunjukkan perilaku tanggung jawab, peduli, kerjasama dan cinta damai dalam melaksanakan komunikasi fungsional.
5. Memahami teks khusus dalam bentuk teks *My Uncle is Zookeeper*, sangat pendek dan sederhana, terkait hari-hari spesial dengan memperhatikan fungsi sosial, struktur teks, dan unsur kebahasaan, secara benar dan sesuai konteks.

L. Indikator Pencapaian Kompetensi (IPK)

1. Menulis kata dengan topic *My Uncle is Zookeeper*

2. Mengidentifikasi kata dengan topic *My Uncle is Zookeeper*
3. Memahami kata dengan topic *My Uncle is Zookeeper*

M. Tujuan Pembelajaran

Setelah mengikuti serangkaian kegiatan pembelajaran peserta didik dapat:

1. Peserta didik dapat meningkatkan keterampilan, pemahaman, dengan kemampuan, mengingat vocabulary dari topic *My Uncle is Zookeeper* dengan struktur teks yang benar sesuai dengan teknik yang akan diterapkan.
2. Siswa dapat Menyebutkan kata dari topic *My Uncle is Zookeeper* terkait dengan kehidupan sehari-hari.
3. Siswa mampu mengungkapkan kata dari topic *My Uncle is Zookeeper* dengan menggunakan ragam bahasa lisan sederhana dalam kehidupan sehari-hari.
4. Peserta didik dapat dipercaya, rasa hormat dan perhatian, tekun, tanggung jawab dan berani
5. Para peserta didik dapat memahami dan menebak kata dan saling kerjasama.

N. Materi Pembelajaran

My Uncle is Zookeeper

Describe Animals in the zoo

Animals in the zoo

- *Elephants*
- *Tigers*
- *Bears*
- *Mongkey*
- *Panda*

No	Words	Definition/ translations	Characteristic/ hyponyms	Example/synonyms	Non-example /Antonyms
1.	Heavy	Berat	Elephants	Hard	Light

2. Siswa dapat menyebutkan kata dari topic *Don't forget it, Please!* terkait dengan kehidupan sehari-hari.
3. Siswa mampu mengungkapkan kata dari topic *Don't forget it, Please!* dengan menggunakan ragam bahasa lisan sederhana dalam kehidupan sehari-hari.
4. Peserta didik dapat dipercaya, rasa hormat dan perhatian, tekun, tanggung jawab dan berani

5. Para peserta didik dapat memahami dan menebak kata dan saling kerjasama.

E. Materi Pembelajaran

Don't forget it, Please!

Short messages and notice:

Example

Messages:

- *Don't forget to water the plant in the afternoon.*
- *Always have breakfast before you go to school.*
- *Dry the towels on the line after you take a bath.*
- *Notice: No food or drink in this area.*

No	Words	Definition/ translations	Characteristic/ hyponyms	Example/syno nims	Non-example /Antonyms
1.	Dry	Kering	light	Crips	Moist
2.	Lock	Kunci	Key	Bolt	Open
3.	Food	Makanan	Eat	Fruit	Drink
4.	Free	Bebas	Enjoy	Freedom	Busy
5.	Wather	Air	Fresh	Rain	Fire

F. Metode Pembelajaran

1. Learning strategy :Frayer Model
2. Learning method :Group discussion, Questioning and Answering question

G. Media dan Alat Pembelajaran

1. Buku Paket
2. Lingkungan Sekitar
3. Referensi Lain

H. Langkah-langkah Pembelajaran

No	Langkah-Langkah Pembelajaran	Waktu
1	Kegiatan Awal: <ul style="list-style-type: none"> • Salam dan berdoa untuk memulai pembelajaran • Memeriksa kehadiran peserta didik sebagai sikap disiplin. • Mengaitkan <i>materi/tema/kegiatan</i> pembelajaran yang akan dilakukan dengan pengalaman peserta didik dengan <i>materi/tema/kegiatan</i> sebelumnya. 	10 menit

	<ul style="list-style-type: none"> Mengajukan pertanyaan yang ada keterkaitannya dengan pelajaran yang akan dilakukan. 	
2	<p>Kegiatan Inti:</p> <ul style="list-style-type: none"> Peserta didik diberi motivasi atau rangsangan untuk memusatkan perhatian pada topic atau guru menjelaskan tentang topic yang sedang berlangsung. Peneliti dan peserta didik mendiskusikan tentang topic <i>Don't forget it, Please!</i> Peneliti menjelaskan dan memberikan contoh bagaimana mencari kata dan yang ada di topic <i>Don't forget it, Please!</i>, dan Mengaplikasikannya di Frayer Model kemudian peneliti dan siswa Mencari kosa kata baru yang berhubungan dengan <i>Don't forget it, Please!</i>, Yang akan dijadikan kata kunci dan akan ditulis dipapan tulis. Peneliti membagikan siswa menjadi beberapa kelompok atau siswa berkerjasama dengan teman sebangku. Peneliti meminta masing-masing kelompok untuk menuliskan empat aspek dalam frayer model dari kata kunci yang telah didapatkan bersama-sama tersebut yaitu, definitions/translation, characteristic/hyponims, example/synonyms, non-example/antonyms. Dari kata yang menurut mereka berhubungan dengan topic pembahasan berdasarkan pendapat mereka sendiri. Peneliti Membuat desain Frayer Model di papan tulis, dan meminta masing-masing kelompok untuk mengisi list disetiap kolom frayer model sesuai dengan pendapat disetiap kelompok. Dan pendapat mereka akan berbeda-beda Peneliti juga menanyakan kembali kepada siswa tentang kata-kata yang siswa dapatkan dari Frayer Model. Setiap siswa harus menjawab pertanyaan dari peneliti. 	60 menit
3.	<p>Kegiatan Penutup:</p> <p>Peserta didik :</p> <ul style="list-style-type: none"> Peneliti akan meminta siswa untuk menulis kosa kata baru yang mereka dapatkan dari Frayer Model berdasarkan kata yang mereka ingat. Peneliti akan menanyakan setiap siswa tentang vocabulary yang telah mereka pelajari di pertemuan berikutnya dan 	10menit

	setiap siwa akan meulis di kata yang berbeda di papa tulis.	
--	---	--

I. Penilaian

1. Kinerja/Praktik

- Bertanya dan menyebutkan macam-macam kata, *Don't forget it, Please!* yang disusun dalam bentuk vocabulary
- Tepat dalam menggunakan struktur umum dan unsur kebahasaan dalam teks tertulis berdasarkan materi yang telah diberikan

INSTITUT AGAMA ISLAM NEGERI

2. Observasi

- Mengidentifikasi kata-kata yang ada di topic *Don't forget it, Please!*.
- Murid serius dalam kegiatan belajar disetiap tahap pemelajaran.
- Menunjukan tanggung jawab, peduli, kerjasama dan damai dalam mengerjakan tugas komunikasi.

MAHERTI,S.Pd**NIP.197310072007012021****REFNA****NIM. 1610203032**

Sekolah	: MTSN 7 Kerinci
Mata Pelajaran	: Bahasa Inggris
Kelas /Semester	: VIII/Genap
Materi Pokok	: Speaking(We got a lot of histories)
Focus	: Vocabulary
Alokasi Waktu	: 2x40 menit
Pertemuan Ke	: 6

A. Kompetensi Inti

KI 1 Menghargai dan menghayati ajaran agama yang dianutnya

KI 2 Menunjukkan perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong), santun, percaya diri dalam berinteraksi secara efektif dengan lingkungan social dan alam dalam jangkauan pergaulan dan keberadaannya
